With MySQL, we were able to reduce our annual database costs by more than 90 percent. MySQL significantly reduced our license, support and maintenance fees!"

Per Larsson, Lycos Europe
MySQL: The World's Most Popular Open Source Database

The MySQL database server is the world's most popular open source database. Over six million installations use MySQL to power high-volume Web sites and other critical business systems — including industry-leaders like The Associated Press, Yahoo, NASA, Sabre Holdings and Suzuki.

MySQL is an attractive alternative to higher-cost, more complex database technology. Its award-winning speed, scalability and reliability make it the right choice for corporate IT departments, Web developers and packaged software vendors.
