## What is phpBB?

phpBB is a high powered, fully scalable, and highly customizable Open Source bulletin board package. phpBB has a user-friendly interface, simple and straightforward administration panel, and helpful FAQ. Based on the powerful PHP server language and your choice of MySQL, MS-SQL, PostgreSQL or Access/ODBC database servers, phpBB is the ideal free community solution for all web sites.

## Who are phpBB?

phpBB are a group of individuals based internationally who believe in Open Source software. The project has been stable since its creation in June 2000 without changes in licensing, leadership or corporate associations. Our goals remain unchanged and clear, to continue developing and supporting a stable, free, Open Source forum system.

## Key Features

- Supports popular database servers
- Unlimited forums and posts
- Multiple language interface
- Private or public forums
- Powerful search utility
- Private messaging system
- Complete customisation with templates
- See the [complete feature list...](#)
