WHAT'S NEW

IDP is a ground-breaking international collaboration to make more than 100,000 manuscripts, paintings and artefacts from Dunhuang and other Silk Road sites freely available on the Internet with top quality colour images.

The items are shown in context, with bibliographies, maps, photographs, site plans and other information relating to their provenance, history and present condition, giving the scholar, the student and the layman a unique insight into Silk Road life during the first millennium AD.
