The Text Encoding Initiative (TEI) Guidelines are an international and interdisciplinary standard that facilitates libraries, museums, publishers, and individual scholars represent a variety of literary and linguistic texts for online research, teaching, and preservation.

The TEI standard is maintained by a [Consortium](#) of leading Institutions and Projects worldwide. Information on projects which use the TEI, who is a member, and [how to join](#), can all be found via the links above. Consortium members contribute to its financial stability and elect members to its Council and Board.

The [Guidelines](#) are the chief deliverable of the TEI Consortium, along with a range of [tutorials](#), [case studies](#), [presentations](#), and [software](#) developed for or adapted to the TEI. The latest release of the Guidelines under development is [P5](#).

The TEI was originally sponsored by the Association of Computers in the Humanities (ACH), the Association for Computational Linguistics (ACL), and the Association of Literary and Linguistic Computing (ALLC). Major support has been received from the U.S. National Endowment for the Humanities (NEH), the European Community, the Mellon Foundation, and the Social Science and Humanities Research Council of Canada.

Want to become active in the TEI Community? Join a [Special Interest Group](#), sign up for the [mailing list](#), and come to our annual

meetings.
