Introducing vBulletin

vBulletin is a powerful, scalable and fully customizable forums package for your web site. It has been written using the Web's quickest-growing scripting language; PHP, and is complemented with a highly efficient and ultra fast back-end database engine built using MySQL.

vBulletin is the ideal community solution for all medium-to-large sites.

powered by

vBulletin's feature-rich content sets it apart from similar forum software.

Key features include:

- Fast and efficient database back end
- Template driven interface
- Powerful search engine
- Language system
- User profiles
- Extensive admin control panel
- Unlimited forums/posts
- Email notification
- Support for COPPA
