About Survey Builder

Survey Builder allows you to easily create and manage online surveys suitable for Internet-based oral history projects, course evaluations, and other endeavors that involve collecting feedback. You do not need to know how to build a Web page that has forms, set up a database to store entries, or do any of the other technical tasks that are normally required to produce interactivity on the Internet. Survey Builder will take care of all of these elements for you.

The Survey Builder was created by [Dan Cohen](#).

Conceived, designed, and programmed by [Dan Cohen](#)

Additional programming by [Simon Kornblith](#)

Illustrations by [Charlie Lawing](#)
