

Encoded Archival Description (EAD)

Official EAD Version 2002 Web Site

The EAD Document Type Definition (DTD) is a standard for encoding archival finding aids using Extensible Markup Language (XML). The standard is maintained in the [Network Development and MARC Standards Office](#) of the Library of Congress (LC) in partnership with the [Society of American Archivists](#).

EAD Tools and Helper Files

A variety of tools and helper files for a number of different XML authoring and editing applications is available at the SAA EAD Roundtable's Web site:

<http://www.archivists.org/saagroups/ead/>

These tools will be kept up to date with the current versions of the software with which they are intended to be used.
